

#### What is a Nurse Health Coach?

"At the heart of Nurse Coaching is growth of the body-mind-spirit system on various levels. The quality of human caring is central in the Nurse Coach-client relationship. The nurse brings (him/her) self into the coaching relationship with the whole self of the patient/client. This relationship provides the client with a safe environment in which to express their feelings, goals, hopes, dreams, and share their vulnerability, pain, and suffering.

- Development of integrative, integral, and holistic perspectives that include a biopsycho-social-spiritual-cultural-environmental model of the person
- Recognition that self-healing is an ongoing process and necessitates intentionality
- Willingness to model self-development (self-reflection, self-assessments, self-evaluation, self-care)
- Willingness to identify creative and self-defeating patterns in self
- Willingness to take responsibility for inner reactions to clients and situations
- Commitment to maintain a sense of presence, authenticity, and self-awareness in nursing practice
- Cultivation of a capacity for deep listening, mindful presence, and not-knowing
- Respect and love for the humanness of clients
- Commitment to creativity and innovation
- Willingness to bear witness to a client's pain and suffering
- Willingness to believe that change is possible for all
- · Commitment to lifelong personal self-development and learning"

#### LIFE EXPECTANCY CALCULATOR

A basic life expectancy calculator used by the US Government Social Security Administration that calculates years remaining and total lifespan solely based on input of gender and date of birth can be found at (https://www.ssa.gov/OACT/population/longevity.html) This calculator does not take into consideration factors such as current health, lifestyle, and family history that might increase or decrease life expectancy.

For example, I am currently 43.5 years old and my data yields a result stating that my life expectancy is 82 years, or the year 2055.

82 years x 365 days per year = 29,930 days total days 38.5 years remaining = 14,052

 $14,052 \times 24 \text{ hours} = 337,248 \text{ hours}$

Michael Gray, RN RN Health Coaching LLC MEND-Yourself RNHealthCoaching.com

I, \_\_\_\_\_\_ have answered the M.E.N.D. CLIENT HEALTH & BEHAVIOR DISCOVERY questionnaire accurately and completely. I understand that my medical history is a very important factor in the development of my Nurse Coach Health and Wellness program. I understand that certain medical conditions which are known to me, but that I do not disclose to my Nurse Coach, may result in serious injury to me.

If any of the above conditions change, I will immediately inform my Nurse Coach of those changes. I, knowingly and willingly, assume all risks (including injury or death) resulting from my failure to disclose accurate, complete, and updated information in accordance with the attached questionnaire. I understand that participation in the above event or activity could include actions or tasks which might be hazardous to the participant named above.

By signing below, I assume any risk of harm or injury which might occur to the participant due to his/her/my participation in the events, behaviors or activities. I release Michael Gray, RN Health Coaching, MendYourself.com and any other entity connected to Michael Gray from all liability, costs and damages which might arise from participation in the above named Nurse Health Coaching.

Before starting any fitness program, change in dietary habits, or any other change in behavior that diverts from your baseline, it is recommended that you get a physical from your doctor, including assessment of heart function, pulmonary function, physical condition and lab work. If I (client) am under the care of a psychiatrist or other mental health professional, I will discuss my plan or program with them as well. I understand to never stop taking prescribed medication before speaking with my prescribing doctor first.

Many medications can have severe adverse effects if stopped abruptly, including increased depression and suicidal ideation, high or low blood pressure, and even death. As a registered nurse, Michael Gray and any nurse coach working with me is not licensed to prescribe medication, nor suggest to cease taking medication. This will always be between me (client) and the prescribing doctor(s).

NOTE: RN Health Coaching encourages you to listen to your body. If it hurts, don't do it. The primary focus for any fitness routine is always safety, so please consider this your (client's) primary focus as well. This includes changes to diet.

If questions or situations arise that require clarification, consult your (client's) physician. If you ever experience chest pain or difficulty breathing, call 911 and get to your nearest emergency room. If at any time I have chest pain, difficulty breathing, or other seemingly urgent medical condition, it is my responsibility to seek immediate emergency medical care. I agree to accept financial responsibility for the costs related to any emergency treatment that might occur related to Nurse Health Coaching.

# Release of Liability

I, \_\_\_\_\_\_ have answered the M.E.N.D. CLIENT HEALTH & BEHAVIOR DISCOVERY questionnaire accurately and completely. I understand that my medical history is a very important factor in the development of my Nurse Coach Health and Wellness program. I understand that certain medical conditions which are known to me, but that I do not disclose to my Nurse Coach, may result in serious injury to me. If any of the above conditions change, I will immediately inform my Nurse Coach of those changes. I, knowingly and willingly, assume all risks (including injury or death) resulting from my failure to disclose accurate, complete, and updated information in accordance with the attached questionnaire.

I understand that participation in the above event or activity could include actions or tasks which might be hazardous to the participant named above. By signing below, I assume any risk of harm or injury which might occur to the participant due to his/her/my participation in the events, behaviors or activities. I release Michael Gray, RN Health Coaching LLC, Mend-Yourself.com and any other entity connected to Michael Gray from all liability, costs and damages which might arise from participation in the above named Nurse Health Coaching.

Before starting any fitness program, change in dietary habits, or any other change in behavior that diverts from your baseline, it is recommended that you get a physical from your doctor, including assessment of heart function, pulmonary function, physical condition and lab work. If I (client) am under the care of a psychiatrist or other mental health professional, I will discuss my plan or program with them as well.

#### (Release of Liability, page 2 of 2)

I understand to never stop taking prescribed medication before speaking with my prescribing doctor first. Many medications can have severe adverse effects if stopped abruptly, including increased depression and suicidal ideation, high or low blood pressure, and even death. As a registered nurse, Michael Gray and any nurse coach working with me is not licensed to prescribe medication, nor suggest to cease taking medication. This will always be between me (client) and the prescribing doctor(s).

RN Health Coaching encourages you to listen to your body. If it hurts, don't do it. The primary focus for any fitness routine is always safety, so please consider this your (client's) primary focus as well. This includes changes to diet.

NOTE: If questions or situations arise that require clarification, I will consult your (client's) physician. If you ever experience chest pain or difficulty breathing, call 911 and get to your nearest emergency room. If at any time I have chest pain, difficulty breathing, or other seemingly urgent medical condition, it is my responsibility to seek immediate emergency medical care. I agree to accept financial responsibility for the costs related to any emergency treatment that might occur related to Nurse Health Coaching.
